• Web Interface

8 1 1 9

- Custom Sponsor Logos
- Ceremony Slides and Overlays
- Automatic Backups
- Community-created Tools
- Alternate Event Formats
 - Multiple divisions
 - Multiple field sets
 - Hybrid ERCs
 - Creative solutions for scrimmages

Configuring the Web Interface

In either the wizard, or under Tools > Options > General, set passwords for each role that you want to have access to the web interface.

- Judge
 - Input award winner information
- Inspector
 - Fill out inspection sheets and update inspection status
- Scorekeeper
 - Update team check-in status

During event setup, you will be required to set a Tournament Manager password. This password can be used to log in to the web interface with the Administrator role, which has access to all the functionality of the roles described on the slide. It is highly recommended that you do not share this password and instead only grant volunteers the specific access they need for their role.

Accessing the Web Interface

- In a web browser on a device connected to the TM network, navigate to the TM server IP address.
- Without logging in, users can view the team list, match schedule and results, and rankings. This may be useful for judges.

Division 1 🔳	- 4-
➡ Logi	n

• In the top right corner, log in to the role that is needed.

Team Check In		Inspection	Awards	
Entry	Summary	Team Number: 22 V Show All Teams	Division 1

Configuring Custom Logos

Name	Width	Height	Name	Width	Height

- Tools > Options > Sponsor Logos
- Built-in logos cannot be removed.
- Small images appear in the top-right corner of most screens.
- Large images appear on the Logo screen and between scrolling sections in the Rankings and Schedule screens.
- Graphics can be added by folder, instead of individually.
- Occasionally, TM displays may need to be restarted to include updated graphics.

- Auto-added slides automatically update with results from the Awards tab.
- Adding custom slides can be an easy way to create uniform lower-thirds for speakers.

- TM automatically creates backup copies of the .db file on both the main TM server and any connected computers.
- On Windows
 - Start > VEX > Automatic Backup Folder
- On MacOS
 - Finder > Automatic Backup Folder

Community-Created Tools

Event Summary

We have a passionate and technically minded community that has developed a number of great tools to enhance the event experience using the Tournament Manager and RobotEvents APIs.

While these tools may be helpful, they are not officially supported by VEX, DWAB, or the RECF. Be sure to have back-up plans in place in case things go awry!
